

## G-TECH INFRASTRUCTURE PRIVATE LIMITED, INDIA

### COMMITMENT TO SUSTAINABILITY

At G-Tech Infrastructure Private Limited (G-Tech Infrastructure), we believe infrastructure is more than concrete, steel, and engineering excellence. It is the backbone of human progress. Every mobility solution we develop, every water system we build, and every energy project we deliver carries a deeper responsibility: to ensure that growth today does not compromise the needs of tomorrow.

We are **ISO 9001:2015**, **ISO 14001:2015**, and **ISO 45001:2018** certified company, reflecting our uncompromising commitment to sustainability, and safety in every project we deliver.

Sustainability is not a parallel agenda for us. It is embedded in our DNA. It shapes the way we conceptualise projects, select materials, deploy technologies, and engage with people and places. From the feasibility study to the last mile of delivery, we ask one fundamental question: Will this leave a lasting positive impact on the environment, communities, and the economy?

#### **We act on our responsibility in three interconnected ways:**

**In the solutions we deliver.** Designing infrastructure that is resilient, resource-efficient, and built to serve for generations.

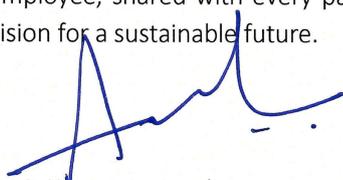

**In the way we work.** Adopting practices that minimise waste, conserve energy, and protect the environment.

**In the partnerships we build.** Working only with suppliers, contractors, and stakeholders who share our values of integrity, transparency, and ethical conduct.

Our sustainability commitments are clear and uncompromising:

- Advance sustainable design, construction, and operational models that improve quality of life while conserving resources.
- Minimise our environmental footprint by integrating innovative technologies and efficient use of materials.
- Uphold the highest levels of corporate governance, ethics, and accountability across all operations.
- Champion inclusivity, fairness, and transparency in our workplace and with our partners.
- Protect and prioritise the health, safety, and wellbeing of every team member.
- Engage meaningfully with communities, respecting local needs, cultures, and aspirations.
- Continuously improve operational processes to enhance social responsibility and environmental stewardship.
- Inspire and encourage our suppliers and partners to adopt sustainable practices throughout their value chains.

We see every project as an opportunity to create more than infrastructure: to create trust, opportunity, and a positive legacy. This Commitment to Sustainability reflects not just our policies, but our principles. It is communicated to every employee, shared with every partner, and reviewed regularly to ensure that our actions remain aligned with our vision for a sustainable future.
